Path # used in the prototype study notebook	Silhouette	Definition of Profile
.001		Capital "A" with no "poles" or "holes" (No protruding letters like "b, d, h, k, l" above midline or below baseline such as "g, p, y, z, x, etc.")
.002		Capital "A" with one "hole" (down stroke) somewhere in the middle of the word --at least one letter away from the capital "A" and not at the end.
.003		Capital "A" with one "hole" (down stroke) at the end.
.005		Capital "A" with one "pole" (high stroke) somewhere in the middle of the word --at least one letter away from the capital "A" and not at the end or next to the end.
.006		Capital "A" with one "pole" (high stroke) located one letter away from the end -- such as "-le, -ly, -de, -te, -dy, -by, etc."
.007		Capital "A" with one "pole" (high stroke) located at the end.

Path # used in the prototype study notebook	Silhouette	Definition of Profile
.025		Capital "A" with two adjacent "poles" (two consecutive up strokes) somewhere in the middle of the word -- at least one letter away from the capital "A" and not at the end
.043		Capital "A" with two adjacent "poles" (two consecutive up strokes) at the terminal end.
.052		Capital "A" with "pole" fused with a "hole" creating a continuous line that breaks both the upper and lower horizon lines. --- This would recognize the present day cursive letter "f" and could also filter 18th century words for the old style "s". <i>f</i>
.092		Terminal "P" or 18th century "s" (<i>f</i>)
.102		Double "P" or double 18th century "s" located in the middle of the name.
.120		Double terminal "P" or 18th century "s" at end of the word.
